

## ACKNOWLEDGMENTS FOR REVISION 8

... missing stuff here

Special thanks go to Kazuyoshi Furutaka for his careful reading of Revision 7 of this manual and of the exercises and test cases. His comments have helped considerably in removal of errors of omission and commission from this document, from the exercises and test cases, and from the code itself. Additional typographical errors were noted by Christophe Suteau and Cyrille De Saint Jean; the author is grateful for their comments as well.

Acknowledgments from previous revisions of this manual are found in Appendix B.
