LIST OF TABLES	ix
LIST OF FIGURES	xiii
ACKNOWLEDGMENTS	xv
ABSTRACT	xvii
 I. INTRODUCTION	 1
A. MODIFICATIONS AND ADDITIONS IN REVISION 8	3
 II. SCATTERING THEORY	 5
A. EQUATIONS FOR SCATTERING THEORY	7
1. R-Matrix and A-Matrix Equations.....	11
2. Derivation of Scattering Theory Equations	15
a. Relating the scattering matrix to the cross sections	23
B. VERSIONS OF MULTILEVEL R-MATRIX THEORY	25
1. Reich-Moore Approximation to Multilevel R-Matrix Theory.....	27
a. Energy-differential cross sections	29
i. One-level two-channel case.....	31
b. Angular distributions	35
c. Specifying individual reaction types	39
d. External R-function	41
2. Simulation of Full R-Matrix	43
3. Breit-Wigner Approximation.....	47
a. Single and multilevel Breit-Wigner cross sections	49
4. Direct Capture Component	51
C. DETAILS AND CONVENTIONS USED IN SAMMY	53
1. Spin and Angular Momentum Conventions	55
a. Quantum vector algebra	59
2. Kinematics	61
a. Derivation of kinematics equations.....	65
b. Kinematics for elastic scattering	71
3. Evaluation of Hard-Sphere Phase Shift	73
4. Modifications for Charged Particles	75
a. Charged-particle initial states.....	77
5. Inverse Reactions (Reciprocity).....	79
D. DERIVATIVES.....	83
1. Derivatives for Reich-Moore Approximation.....	85
a. Derivatives with respect to R-matrix	87
b. Derivatives with respect to resonance parameters	91
c. Derivatives with respect to channel radius.....	93
d. Derivatives of logarithmic external R-function.....	97
e. Derivatives with respect to p -parameters	99
2. Derivatives for MLBW and SLBW Approximations	105
3. Details Involving Derivatives	107

III. CORRECTIONS FOR EXPERIMENTAL CONDITIONS	111
A. THEORETICAL FOUNDATION FOR NUMERICAL BROADENING	113
1. Analyst's Responsibility for Auxiliary Energy Grid	115
2. Choose Auxiliary Energy Grid	117
3. Perform Numerical Integration	121
B. DOPPLER BROADENING	125
1. Free-Gas Model of Doppler Broadening	127
a. Derivatives with respect to effective temperature T	129
2. Leal-Hwang Doppler Broadening	131
3. High-Energy Gaussian Approximation to Doppler Broadening	135
4. Crystal-Lattice Model of Doppler Broadening	137
C. RESOLUTION BROADENING	139
1. Gaussian plus Exponential Resolution Broadening	141
a. Resolution broadening: Gaussian	143
b. Resolution broadening: exponential	149
c. Resolution broadening: convolution of Gaussian and exponential	151
2. Oak Ridge Resolution Function (ORR)	153
a. Individual components of the ORR resolution function	155
b. Converting length to time dependence	159
c. Convolution of components of ORR resolution function	161
3. RPI (and GELINA and nTOF) Resolution Broadening	163
a. Components of the RPI/GELINA/nTOF resolution function	165
b. Input for the RPI/GELINA/nTOF resolution function	169
4. Straight-Line Energy Average	173
5. User-Defined Numerical Resolution Function	175
D. SELF-SHIELDING AND MULTIPLE-SCATTERING CORRECTIONS	177
E. OTHER EXPERIMENTAL CORRECTIONS	183
1. Transmission Experiments	185
a. Transmission through a non-uniform sample	187
2. Combining Several Nuclides in a Single Sample	189
3. Data-Reduction Parameters	191
a. Explicit normalization and/or background functions	193
b. User-supplied data-reduction parameters	197
4. Paramagnetic Cross Section	199
5. Detector Efficiency	201
6. Self-Indication Measurements	203
7. Corrections for Angular Distributions	205
8. Energy Scale Dependence on t_0 and L	207

IV. THE FITTING PROCEDURE	211
A. DERIVATION OF BAYES' EQUATIONS	213
1. Derivation of SAMMY's Solution Schemes	217
2. Chi-Squared and Weighted Residuals	221
3. Iteration Scheme	225
B. IMPLEMENTATION OF BAYES' EQUATIONS	227
1. Solving Bayes' Equations: N+V Inversion Scheme	229
2. Solving Bayes' Equations: I+Q Inversion Scheme	231
3. Solving Bayes' Equations: M+W Inversion Scheme	233
C. CONSTRUCTING THE PARAMETER SET	235
D. TREATMENT OF DATA COVARIANCE MATRICES	237
1. Derivation of Data Covariance Matrix Equation	241
2. Propagated Uncertainty Parameters	251
3. Implicit Data Covariance Matrix	255
E. MISCELLANEOUS TOPICS RELATED TO COVARIANCES	259
1. Simultaneous Fitting to Several Data Sets	261
2. Retroactive Parameter Covariance Matrix Method	263
3. Least Squares and Other Extensions of SAMMY's Methodology	265
4. Covariances for Calculated Cross Sections	267
5. Calculating Average Values and Uncertainties for Resonance Widths	269
6. Augmenting the Resonance Parameter Covariance Matrix	271
a. Modifying the parameter uncertainties	275
V. POST-PROCESSORS AND OTHER MISCELLANEOUS TOPICS	277
A. RECONSTRUCTING POINT-WISE CROSS SECTIONS	279
B. INTEGRAL QUANTITIES	281
1. User-Supplied Flux for Watt Spectrum Average	285
C. AVERAGING THE CROSS SECTIONS	289
1. Energy- or Time-Weighted Averages for Experimental Data	291
2. Bondarenko-Weighted Averages	293
3. Unweighted Energy Average	295
D. STELLAR-AVERAGED CAPTURE CROSS SECTIONS	297
E. PSEUDO CROSS SECTIONS FOR TESTING	301
F. SUMMED STRENGTH FUNCTION	303

VI. INPUT TO SAMMY	305
A. THE INPut FILE	307
1. Alphanumeric Commands	327
B. THE PARAmeter FILE	379
C. THE DATa AND Data CoVariance FILES	431
1. Experimental Data	433
2. Explicit Data Covariance Matrices	435
3. Implicit Data Covariance (IDC) Matrices.....	437
a. Input for propagated uncertainty parameters.....	439
b. User-supplied implicit data covariance matrix.....	441
c. Implicit data covariance for normalization and background	443
D. INTEGRAL DATA FILE	445
E. INTERACTIVE INPUT TO SAMMY	447
F. OTHER INPUT FILES FOR SAMMY	451
1. The AVeraGe File.....	453
2. Input to Produce Files in ENDF File 2 or File 32 Format	457
3. Using ENDF File 2 as input to SAMMY.....	463
4. Format of the MXW file	465
5. Crystal-Lattice Model File.....	467
VII. OUTPUT FROM SAMMY	469
A. LINE-PRINTER OUTPUT	473
B. OUTPUT TO BE USED AS INPUT	475
C. PLOT OUTPUT	479
D. COMPLETE SET OF PARTIAL DERIVATIVES FOR RESONANCE PARAMETERS.....	483
E. COMPACT FORMAT FOR PARAMETER COVARIANCE INFORMATION	485
F. PUBLICATION AIDS	487
G. OTHER OUTPUT FILES	489

VIII. UNRESOLVED RESONANCE REGION.....	491
A. EQUATIONS FOR UNRESOLVED RESONANCE REGION.....	493
1. Derivation of Non-Elastic Average Cross Section	499
B. INPUT FOR ANALYSIS OF DATA IN UNRESOLVED RESONANCE REGION.....	505
C. OUTPUT FROM ANALYSIS IN UNRESOLVED RESONANCE REGION	519
D. CONVERTING SAMMY/URR PARAMETERS TO ENDF/B PARAMETERS.....	521
1. Relation of SAMMY/URR Radius to ENDF/B Radius.....	523
IX. THE ENDF CONNECTION	527
A. CSEWG CONSTANTS	531
X. AUXILIARY PROGRAMS	533
A. ANGODF: CONVERT FROM ENERGY/ANGLE TO ANGLE/ENERGY	537
B. CONVRT: CONVERT FROM REFIT INPUT TO SAMMY OR VICE VERSA.....	539
C. SAMAMR: ADD, MIX, OR RECOVER VARIABLES	541
D. SAMAMX: MODIFY A SINGLE VALUE	553
E. SAMCPR: COMPARE RESULTS	555
F. SAMDIS: STATISTICAL DISTRIBUTIONS	557
G. SAMFTZ: FIX TZERO.....	559
H. SAMORT: PLOT THE OAK RIDGE RESOLUTION FUNCTION	561
I. SAMPLT: ALTERNATIVE FORM FOR PLOT FILES.....	563
J. SAMQUA: RESONANCE QUANTUM NUMBERS.....	565
K. SAMRPT: PLOT RPI RESOLUTION FUNCTION	569
L. SAMRST: PLOT RESOLUTION FUNCTION.....	571
M. SAMSMC: MONTE CARLO MULTIPLE SCATTERING	573
N. SAMSTA: STAIRCASE PLOTS.....	575
O. SAMTHN: THINNING DATA	577
P. SUGGEL: ESTIMATING L AND J	579
Q. SAMRML: CALCULATE CROSS SECTIONS FROM ENDF FILE 2.....	583
R. SAMGY2: SMOOTH THE TABULATED Y2 FUNCTION.....	585
S. ??? ENDF File 33	587

XI. HELPFUL HINTS FOR RUNNING SAMMY	589
A. STRATEGY FOR DATA EVALUATION WITH SAMMY	591
B. PROCEDURES TO FOLLOW WHEN YOU HAVE PROBLEMS	599
C. MISCELLANEOUS COMMENTS AND SUGGESTIONS	603
XII. EXAMPLES	609
A. TUTORIAL	611
B. TEST CASES	613
C. MONTE CARLO SIMULATIONS OF MULTIPLE-SCATTERING CORRECTIONS	623
XIII. DESCRIPTION OF THE COMPUTER CODE SAMMY	625
A. DYNAMIC ALLOCATION OF ARRAY STORAGE.....	627
B. USE OF TEMPORARY DATA FILES TO STORE INTERMEDIATE RESULTS.....	631
C. DIVISION OF THE PROGRAM INTO AUTONOMOUS SEGMENTS	641
D. COMPUTER-SPECIFIC FEATURES.....	651
E. ORELA DATA FORMAT	653
F. CONFIGURATION AND DISTRIBUTION SYSTEM.....	655
REFERENCES	661
APPENDIX A. VERSIONS OF THIS MANUAL.....	669
A.1 MODIFICATIONS AND ADDITIONS IN REVISION 1	671
A.2 MODIFICATIONS AND ADDITIONS IN REVISION 2	673
A.3 MODIFICATIONS AND ADDITIONS IN REVISION 3	675
A.4 MODIFICATIONS AND ADDITIONS IN REVISION 4	677
A.5 MODIFICATIONS AND ADDITIONS IN REVISION 5	681
A.6 MODIFICATIONS AND ADDITIONS IN REVISION 6	683
A.7 MODIFICATIONS AND ADDITIONS IN REVISION 7	687
APPENDIX B. ACKNOWLEDGMENTS FROM EARLIER VERSIONS	693
