

X.S. ??? : MAKE ENDF FILE 33

The program ??? was written by Dorothea Wiarda to create ENDF File 33, to be used in conjunction with File 32 when creating covariance matrices for the evaluated cross sections. See Section IV.E.6 for a description of why this is needed.

Need Doro to provide information re the name of the code and what the input looks like,
Also to provide the code to enclose with SAMMY distribution. Maybe.
