

LIST OF FIGURES

<u>Figure</u>	<u>Page</u>
II.1 Schematic of entrance and exit channels as used in scattering theory.....	6
II B2.1 Reich-Moore approximation vs. full R-matrix for artificial example of test case tr110	44
II C2.1 Schematic of particle pairs for kinematics calculation	61
II C5.1 Schematic of kinematics for inverse reactions.....	80
III A1.1 Unbroadened cross section calculated with too few points in the auxiliary grid	115
III A1.2 Incorrect Doppler-broadened cross section calculated with too few points in the auxiliary grid.....	115
III A1.3 Unbroadened cross section calculated with an adequate number of points in the auxiliary grid.....	116
III A1.4 Doppler-broadened cross section calculated with an adequate number of points in the auxiliary grid	116
III D.1 Geometry for the single-scattering correction to capture or fission yield, for a neutron incident on the flat surface of a cylindrical sample.....	179
XIII C.1 Flow chart for commonly used SAMMY modules.....	649
